## Professional Summary

Full Stack Developer specialized in creating clean, maintainable, and scalable web applications. Recently graduated in Software Development, I have hands-on experience building and deploying production-ready systems in both startups and academic projects.

## Experience

### Full Stack Developer — Tickpass (Jun 2025 – august 2025)

Startup focused on event and nightclub management. Contributed to the development of new features, bug fixing, and extensive testing to ensure a smooth user experience.

Stack: Next.js, TypeScript, Supabase, tRPC

## Education

Universidad Santo Tomás de Aquino — Software Development Degree (2023 – 2025)

San Javier School — High School Diploma in Economics and Mathematics

## Projects

### Eventum (2025)

- Developed a web app for speaker and file management in academic events.
- Implemented an Excalidraw-style board for planning event details.
- Created an email automation service for contacting attendees.
- Built an image converter service to compress and host images in WebP format.

### Kamaleonica (2025)

- Developed an e-commerce platform to sell jeans.
- Implemented product cart functionality with add/edit/delete features.
- Integrated MercadoPago Pro API for checkout and payments.

## Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript

Frontend: React, Tailwind, Next.js

Backend: Node.js, Express, tRPC

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Redis

Dev Tools: Webpack, Vite, Docker, Git, GitHub

Deployment: Vercel, Render

Project Management: Jira, Trello, Miro

Testing: Vitest, Jest, Unit, Integration, End-to-End

Other Tools: OAuth, JWT, Cookie-Parser, Nodemon, NPM, Yarn, Bun

## Languages

Spanish: Native

English: Upper Intermediate (B2)
